

Remarks

The Examiner requests that a status paragraph be added as the first paragraph of the specification.

Applicants have amended the first paragraph of the specification to include a claim to benefit of German Application No. 199 11 509.5, filed March 15, 1999. Also submitted herewith is a Supplemental Information Data Sheet which reflects the domestic and foreign priority status of the instant application. The Supplemental Information Data Sheet also contains information for Inventor Six, Flavio Solca, who is listed as an inventor on the executed Declaration filed January 8, 2002, but who was inadvertently omitted from the Initial Information Data Sheet.

In response to the requirement for election of species, Applicants hereby elect without traverse to prosecute in this application the compound of Example 3(11) (*see e.g.*, page 68 of the specification) having the chemical name 4-[(3-bromophenyl)amino]-6-[2-(6,6-dimethyl-2-oxomorpholin-4-yl)ethoxy]-7-methoxyquinazoline which falls within the subject matter of previously elected Group 4, claims 1-7 and 9-13 (part of each), drawn to the subject matter (i.e., compounds, compositions, and method of treatment of formula (I)) with the following substituents:

**X** is a nitrogen atom;  
**R1 and R2** together do not represent -CH=CH-CH=CH-, -CH=CH-NH- or -CH=N-CH- group;  
**B** is a group selected from groups (h), (i), (n), or (o);  
or **A and B** together represent group (h);  
**D** is group (a);  
or **C together with D** represent a group selected from groups (a) - (g).

Applicants reserve the right to prosecute in one or more divisional applications whatever subject matter is not examined or allowed here.

Applicants respectfully submit that all the pending claims are allowable and therefore solicit a Notice of Allowance for all of the pending claims.

If the Examiner feels that a telephone interview would be helpful in advancing prosecution of this application, the Examiner is invited to contact the attorney below.
